

“For large buildings, hospitals and campuses in tough economic times: an efficient lighting system can help lower monthly expenses, decreasing power, maintenance and bulb costs.”

Skyscraper/Hospital/Campus Plan: LumiLuxe

For the most comprehensive lighting solution in the industry you should choose the LumiLuxe. This package is best for facilities with monthly power bills over \$30,000 and customers who are looking for a 1-stop-shop for a solution. This package includes everything your facility needs to reduce costs, save energy and eliminate maintenance costs both in the short and long term.

Best of all we offer turnkey solutions where you just contract with us from start to finish. .

Each inefficient light is costing you a pile of cash and you have to stop the bleeding from we provide results fast - in as little as 5 business days and with LumiLuxe you are immediately put at the front of the line.

LumiLuxe provides your facility with the best lighting solution in the business. We provide great customer service and with our **LumiLuxe** plan you never have to worry again about being up to date on the latest energy efficiency standards

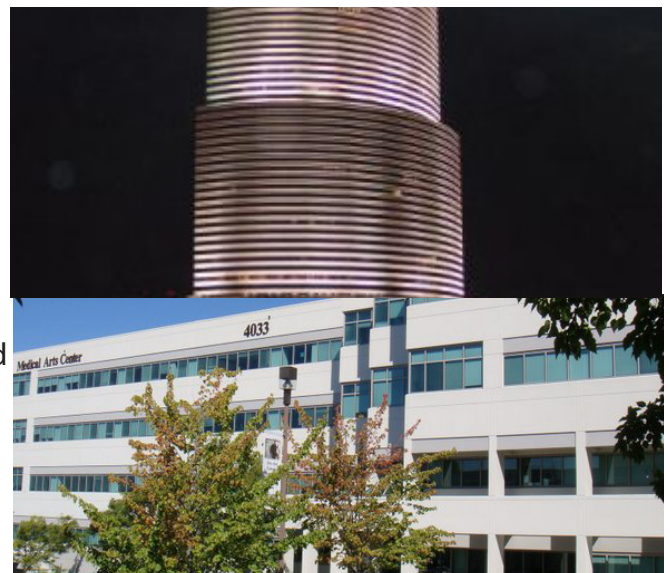

Here is an example of what you get:

PHASE1 Evaluate and catalog

- We do a complete facility wide lighting audit of all major building systems for up to 3 buildings on one property
- We catalog and photograph every light fixture, switch, and bulb
- Complete lighting design update for all major lighting components
- 1,2, 3, 5, 7, 10 and 20 year payback numbers
- LEED consultation report for your building
- Environmental Engineers report for your facility

PHASE2 Implementation

- We present all the possible system upgrades with detailed plans and timelines.
- We go over each upgrade and help you decide which solution to start with and which we can do later.
- We schedule the first plan
- We provide an environmental impact final report for you records detailing how the upgrades have positively affected our world.

Large buildings can save hundreds of thousands per year
