**UL Listed by CREE Lighting solution

The SmartSix replaces a Halogen or CFL in six inch can applications and saves you 50% of energy, with a 2 year warranty. This product will pay for itself in energy savings alone within 2 years, and helps keep bulb and maintenance costs low. This gives you 5 or more years of cost free profitable lighting! When the bulb expires it is aluminum so you can simply recycle it for generations.

LimeLumi and our installers make sure to recycle all the lighting systems we remove.
